“ Compliance is a never-ending story. This year we have EU MDR standards coming into force. This has taken us any hundreds of hours over the last few months, and without Compliance Navigator it would have been far, far more. We have saved a lot of time.

CEO, Czech Republic

“ A solution such as Compliance Navigator provides that confidence that you are not missing anything that you may do if using other solutions or workflows. It's that peace of mind that we're not going to veer off track.

Regulatory Affairs, UK

“ Compliance Navigator allows us to manage all documents related to the certification criteria of a product in one location. If standards are stored on an individual's computer, a major concern is that old versions will not be replaced and the volume of data will continue to increase. With Compliance Navigator, we are always able to access the latest version, without worries.

Director and General Manager of Quality, Japan

“ It's improved our system from all of those perspectives - cost, efficiency, quality, compliance.

VP of Quality and Regulatory Affairs, USA

“ We have a fairly diverse product portfolio and [before Compliance Navigator] it was taking up a lot of time trying to maintain standards in terms of working more efficiently.

Senior Regulatory Affairs Specialist, USA

“ You save money if you save time, it is as simple as that at the end of the day.

Compliance Officer, USA
